

Smart Resume Screener

Sample Job Description for Testing

Important for testers: Copy the **complete Job Description** below into the Job Description field of the application. Do not copy only the introductory paragraph. The overview, requirements, preferred skills, and responsibilities together form the job description used by the AI matching system.

Job Title: Software Developer Intern

Experience: Internship / Entry Level

Location: Open to Remote / On-site

Job Description

We are looking for a motivated Software Developer Intern to join our engineering team. The candidate will work on software development tasks, build and maintain applications, and collaborate with team members to solve technical problems.

Requirements

- Strong programming knowledge in **Java** and **Python**.
- Good understanding of **SQL** and relational databases.
- Knowledge of **React** and modern frontend development.
- Understanding of **REST APIs** and backend communication.
- Working knowledge of **Git** and **GitHub**.
- Strong understanding of **Data Structures and Algorithms**.
- Good problem-solving and analytical skills.
- Ability to communicate effectively and work in a team.

Preferred Skills

- Experience with Node.js or other backend technologies.
- Knowledge of Docker or basic cloud/deployment concepts.
- Experience building academic, personal, or internship projects.
- Familiarity with Agile software development practices.

Responsibilities

- Develop and test software features under the guidance of senior developers.
- Work with frontend and backend components of applications.
- Write clean, maintainable, and well-documented code.
- Debug issues and participate in code reviews.
- Use Git for version control and collaborate with the development team.

How to Test

1. Open the deployed Smart Resume Screener.

2. Copy the **entire Job Description section** above, including the introductory paragraph, Requirements, Preferred Skills, and Responsibilities.
3. Paste it into the Job Description field and save it.
4. Upload a resume in PDF or TXT format.
5. Select the saved job and click **Run matching**.
6. Review the candidate score, justification, matched skills, and missing skills.
